### **What is this course about?**

Primarily this is a practical course. You will gain a structured understanding of stone as a material, learn basic carving techniques and discover ways of being creative with this wonderful medium. Through practising all of these aspects, they will come together in the creation of your finished piece of work. Using your initial sketches of what you would like to carve (plan view, front view and section) to help understand the form before modelling it in clay, followed by one-to-one discussion, you will then quickly move into carving to progress your ideas into stone.

### **What topics do we cover?**

- Learn basic stone carving techniques and knowledge of tools
- Apply the use of drawings and clay forms that precede the carving process
- Discover how to apply your own creative idea to the medium of stone to progress to a finished piece

**By the end of this course you will:** gain basic knowledge of stone carving skills through producing work carved from stone.

### **About your tutor**
