LOCATION	MERMAID COURT

DAILY BREAKDOWN

Date	Topics/ Skills covered	Model?
12/02/2022	<p>This class is an introduction to Digital Illustration, using the Adobe Photoshop software. We will start the day with a series of short drawing exercises to get a better understanding of Photoshop and improve our drawing skills. Then we will expand on this by working on one illustration to a brief, that will be in colour.</p> <p>This is both a creative and technical course, its aim is for students to develop an understanding of digital drawing software and the ways they can use it in their artistic practice. Students are welcome to share their style, drawings and bring questions to the tutor.</p> <p>On top of learning about Photoshop, we will practice the different steps of creating an illustration, from idea to looking for references, making rough thumbnails, and finally creating a finished piece.</p>	No
